#### OBJECTIVES OF THE PROJECT

The climatic environmental situation over the years is getting worse and worse. In many European countries, especially in the Mediterranean area, there are more and more climate dysfunctions.

The strategies we propose in this project to limit these problems are: the promotion of new methodologies and activities to the leaders of educational institutions, the empowerment of new and old generations on the issue and the introduction of practical and engaging public activities to be proposed to young people.

During the exchange, participants will apply themselves in non-formal education activities so that such innovative strategies emerge as the goal of the project. These will then be transmitted to the school through a meeting between the participating youth and school leaders.
