ABOUT

The NCD Conference aims to bring together the Public Health and Youth sectors to ensure better working and living conditions of young people in Europe.

Primarily, we would like to empower youth workers and leaders to set up a healthy environment for their constituents locally.

At the conference, we will address the health literacy aspect of the context of NCDs.

The idea of the conference is to bring together from 80 to 100 public health professionals, youth workers, youth leaders and young people from across Europe, who are interested in increasing health literacy in the context of NCDs.
